Washington's Salish Sea

- Recreational and commercial Dungeness Crab fishery
- Commercial salmon fishery
 - Chinook, coho, chum, sockeye and pink

Derelict Crab Pots

- Estimated 12,000 lost annually
- Pots can fish up to 2.2 years
- 180,000 harvestable crabs lost per year
- User error most common cause

Ghost pots of Puget Sound

12,000 crab pots are lost in Puget Sound each year. A single lost crab pot without escape cord can kill up to 30 crabs until deterioration. That adds up to 180,000 harvestable crabs lost each year. To avoid this, follow best fishing practices when you go crabbing:

- **AVOID MARINE TRANSIT** and ferry lanes
- **USE MULTIPLE BUOYS** in high current areas
- **MARK YOUR GEAR** with clearly visible buoys
- **WEIGHT YOUR LINE** to sink below the surface and avoid being cut by passing boats
- **WEIGHT YOUR POTS** so they do not move in high currents or tidal changes
- **USE THE CORRECT LENGTH OF LINE.** Use 1/3 more line than water depth.
- **SECURE LID AND ESCAPE PANELS WITH BIODEGRADABLE COTTON ESCAPE CORD.** This allows crabs to escape from lost pots after the cord degrades.
- **ADD BUNGEE CORD TO TOP DOOR ESCAPE PANELS.** This increases chances of escapement once escape cord has disintegrated.

partners in marine conservation

Northwest Straits Foundation

removes lost and abandoned fishing gear from Puget Sound. Since 2001, the Foundation has worked cooperatively through the Northwest Straits Marine Conservation Initiative with fishermen, tribes, and agencies to document the impacts of derelict gear, remove damaging gear, and raise awareness about the harm caused by derelict gear in Puget Sound.

Progress to date As of May 2015, we have removed 5,500 derelict nets, 3,800 derelict crab pots and restored 790 acres of critical marine habitat in Puget Sound. Over 442,000 animals representing 260 species were found entangled in this gear, including marine mammals, birds, and commercially valuable fish and shellfish.

Research plays a big role in how the Northwest Straits Foundation tackles the problem of derelict fishing gear. Results of the Foundation's recently completed crab pot escapement study suggest that crab pot design, especially panel opening design, affect crab escapement rates and success. Designs with panel doors that drop open, instead of those that need to be pushed open, increase escapement rates. The good news is you can greatly increase your crab pot's effectiveness with a cheap fix, by adding a bungee cord to the top to pull the door open after the escape cord disintegrates. **Learn how you can volunteer with your local Marine Resources Committee (MRC) or make a gift to support our work at our website.**

**CATCH
MORE
CRAB!**

*Seven helpful
tips to prevent your
crab pot from becoming
one of the **12,000 pots lost in
Puget Sound** each year:*

- **Avoid high traffic**, marine transit and ferry lanes.
- **Check tides and currents.** Avoid crabbing during strong tidal changes and currents.
- **Make buoys more visible.** Add a second buoy or a stick and flag.
- **Use a weighted line** to sink below the surface and avoid being cut by passing boats.
- **Weight your crab pots** so they do not move with currents or tidal changes.
- **Use longer line.** Use 1/3 more line than the water depth to allow for changes in tides and currents.
- **Secure lid and escape panels with cotton (biodegradable) escape cord.** Crabs can escape from lost pots after the cord degrades.

KEEP YOUR POTS CATCH MORE CRAB!

12,000 Crab Pots are Lost

in Puget Sound each year. A single lost crab pot can kill up to 50 crabs until it deteriorates – that's 180,000 harvestable crabs that could otherwise make it to the dinner table!

The Northwest Straits Initiative

Since 2002, we have removed more than 5,700 derelict nets, 4,800 derelict crab pots and restored 830 acres of critical marine habitat.

Who We Are

A nationally-recognized conservation initiative, the Northwest Straits Initiative brings together scientists and community volunteers in northwest Washington, coordinated by a non-profit Northwest Straits Foundation, a state government partner Northwest Straits Commission, and seven county-based Marine Resources Committees.

Enter to win!

To be entered into a prize drawing for new crabbing gear, please complete the brief survey found at the following link: <https://goo.gl/iwvhXB>

Results

- Videos reach over 300,000 people annually
- Over 6,000 informational packets distributed in 2017
- *68% surveyed changed their practices
 - *110 people surveyed

Derelict Nets

- More than 5,600 legacy derelict nets removed
- 830 acres restored
- Over 450,000 marine organisms entangled
- Newly lost net Reporting, Response, and Retrieval Program
- State and Tribal co-management of fisheries
- Only 7 out of 78 confirmed reports came from fisher

Report lost fishing nets within 24 hours

Lost and abandoned fishing gear continues to fish, killing marine animals and destroying habitat. You can help the Northwest Straits Foundation remove derelict fishing nets from Puget Sound.

Report lost or abandoned nets or pots to
www.derelictgear.org

(360) 733-1725 Northwest Straits Foundation
(855) 542-3935 WA Dept of Fish & Wildlife

Include the following information in your report:

- Type of gear
- Latitude (ex 4834.333)
- General location
- Longitude (ex 12300.333)
- Approximate water depth

*There are **no penalties** associated with reporting lost fishing gear. **Nets are dangerous!** Do not attempt to remove nets. Divers, stay a safe distance away.*

Northwest Straits Foundation removes lost and abandoned fishing nets from Puget Sound. Since 2001, the Foundation has worked cooperatively through the Northwest Straits Marine Conservation Initiative with fishermen, tribes, and agencies to document the impacts of derelict gear, remove damaging gear, and raise awareness about the harm caused by derelict gear in Puget Sound.

progress to date

As of June 2015, we have removed more than 5,600 derelict fishing nets and 3,600 derelict crab pots, restoring 800 acres of important marine habitat in Puget Sound. Over 460,000 animals representing 240 species were found entangled in this gear, including mammals, diving birds, and commercially valuable fish and shellfish. An estimated 10-30 nets are lost each fishing season. An ongoing Reporting, Response and Retrieval program is in place to ensure newly lost nets are recovered before they become derelict.

reporting lost nets

Fishermen must report lost or abandoned nets within 24 hours of loss using the reporting information on the front of this card. This no-fault, no-penalty program enables real-time response by the Foundation and its partners to ensure the reported nets are located and removed by trained divers and removal vessels. BE A SOUND THINKER

REPORT LOST NETS

We all care about Puget Sound. It helps define us. Supports our livelihoods. Lets us pass something on to future generations. So report lost nets as soon as possible. There are no penalties, removals are free and this simple act can do more than save fish.

To report lost gear call 360-733-1725 (NW Straits Foundation) or 855-542-3935 (Washington Department of Fish & Wildlife), or visit derelictgear.org.
